

OUR SERVICES

- Feasibility Study & Technical Consultation
- Regulatory Approvals for Biogas Plant Setup
- Supply, Installation & Commissioning
- Ongoing Maintenance & Support
- Project Investment Planning
- Customized Biogas Solutions Based on Waste Type & Volume
- Containerized Modular Plants for Limited Spaces (Hotels, Institutions)
- Large-Scale Biogas Plants for Industrial or Municipal Waste

FOOD & ORGANIC WASTE TO ENERGY SOLUTIONS

A CIRCULAR ECONOMY
SOLUTION FOR A CARBON
NEUTRAL FUTURE

About Us

We provide innovative systems that convert organic waste into clean energy using anaerobic digestion technology.

Our smart monitoring tools help optimize energy use and reduce operational costs—enabling sustainable, cost-effective waste management

Ideal for

- Municipalities
- Markets, Malls & Slaughterhouses
- Poultry/Dairy Farms
- Restaurants & Caterers
- Food Processing Units

Why us

- Expertise in multiple size projects.
- Handles varied feedstocks: food waste, agri-waste, dung, effluent
- Reduces landfill waste & methane emissions
- Generates clean biogas & nutrient-rich compost
- Fast Installation
- Compact Design
- Eco-Safe Operations
